Introduction **iii**

Acknowledgements **v**

1 Title of the first chapter **1**

1.1 Title of the first section of the first chapter 1

1.2 Title of the second section of the first chapter 1

2 Title of the second chapter **3**

2.1 Title of the first section of the second chapter 3

2.2 Title of the second section of the second chapter 3

3 Title of the third chapter **5**

Bibliography **7**

Introduction

Introduction text

Acknowledgements

Acknowledgements text

Chapter 1

Title of the first chapter

1.1 Title of the first section of the first chapter

Definition 1.1. A definition

Example 1.2. An example

A paragraph ...

Proposition 1.3. A proposition

1.2 Title of the second section of the first chapter

Remark 1.4. A remark

A list of formulae

1. $t_{ii}(p) = p$ if $p \in U_i$;
2. $t_{ij}(p) = t_{ji}(p)^{-1}$ for any $p \in U_i \cap U_j$;
3. $t_{ij}(p) \cdot t_{jk}(p) = t_{ik}(p)$ for any $p \in U_i \cap U_j \cap U_k$.

A diagram

$$\begin{array}{ccc} f^*E & & E \\ \downarrow & & \downarrow \\ M' & \longrightarrow & M \end{array}$$

A numbered displayed formula

$$(f^*E)_p = E_{f(p)}. \tag{1.1}$$

An unnumbered displayed formula

$$a = b \wedge b = c \Rightarrow a = c$$

Notation explanation

Notation 1.5. If k is clear form the context, we will simply write $\sigma(P, \xi)$.

A lemma

Lemma 1.6. Statement of the lemma

Chapter 2

Title of the second chapter

2.1 Title of the first section of the second chapter

A corollary

Corollary 2.1. Statement of the corollary

2.2 Title of the second section of the second chapter

A theorem

Theorem 2.2. Statement of the theorem, including an unnumbered displayed formula

$$HP_k\left(\sum_{j=1}^{n} g(X_j)\right) = \alpha_k(\sigma_{n,1}, \ldots, \sigma_{n,k}).$$

An inline formula at the top of the page: $\sin^2 \alpha + \cos^\alpha = 1$, for any $\alpha \in \mathbb{R}$.

Chapter 3

Title of the third chapter

A quotation [1]

A reference to a numbered formula (1.1)

A reference to the first section of the first chapter 1.1
